APRIL WORKSHOP

LAUNCHING YOUR GRAD!

Help your grads achieve a successful launch.

Your grads are getting ready to take their next independent steps very soon. Perhaps they are planning to go to university or leaving home for the first time.

Are you a parent, grandparent or friend of a young person who is taking these next steps? Do you want to know how to help them learn how to:

- manage their money
- spend wisely
- save and invest
- avoid bad debt
- organize their important documents

This workshop is for you.

Do your grads have a plan and do they have the means to make that happen? Do they know how to manage their money? Do they know which documents they will need and where to find them?

In this workshop you will get tips, techniques and strategies along with the necessary organizational tools that will show you how you can support your children, grandchildren, family members or friends as they prepare for their future.

You will be introduced to the four quarter\$ Wealthbuilder Kit which is a simple, easy to use, step-by-step program with a manual, that when implemented guarantees financial success.

Methods learned here will grow with them and help them achieve a successful launch as they move on.
